THE CAPTAIN

Gianni Bonannini

Being a yacht captain requires a combination of technical skills, leadership abilities, and a deep understanding of maritime regulations and safety procedures. A captain must be adaptable, decisive, and capable of handling a wide range of responsibilities to ensure a successful and safe voyage.

This is the perfect description of our Captain Giovanni Bonannini. He was born on July 1, 1970 in Sassari on the beautiful island of Sardinia. His vast experience began as a young child. At the age of 8, he was often seen fishing and swimming with his family. His family consisted of several brothers all with an abundance of nautical experience ranging from ship Captains to Coastal Guards.

Giovanni (aka Gianni) studied at the Technical Institute in La Maddalena. While studying he started deep diving and free diving lessons. At the age of 16 he received his Diving License and later on at the age of 19 acquired his Dive Master License. He then became a free diving instructor.

After graduating he then began his experience at sea:

Cadet Officer - Petrol Tanker Ship.

Engineer - Power Plant engineer on a US Naval Ship (7 years)

Yacht captain 19,70 mt - Unis

Chief Engineer - Mangusta 39 mt - Zed (1 year)

Yacht Captain - Motor Yacht 60 mt - Adams II (6 years)

Yacht Captain - Cranchi 39 mt - Laura

Yacht Captain - Canados 23 mt - ICEBERG (2023 - present)

Giovanni has many passions, but his first one is his family. He has 6 children all ranging from different ages. He is married to Michelle. He also has many hobbies such as playing the trumpet, cooking and fishing. But his real passion during his free time is designing handcrafted knives and fishing spears.
